

EcoLine

From the makers of **CodeLine**

Designed to meet the demands
of Low Pressure Applications
"Cost Effectively"

EcoLine is a product of pioneering research in membrane housing that aims at maximising the performance of your water treatment system.

The 4" EcoLine Series is available in pressure ratings of 300 PSI, end port option. The vessels are equipped to meet all your low pressure applications for Reverse Osmosis, Nanofiltration, Ultrafiltration & Microfiltration.

40L30

Unique Benefits

Single-piece
Head Assembly

Single piece head assembly made of high grade Engineering Thermoplastic, for high strength & corrosion resistance.

FNPT Permeate
port

3/4" FNPT Permeate port connection, to incorporate higher flow rate.

Spiral
Retaining Ring

Corrosion resistant, spiral retaining ring lets access to membranes in seconds.

Improved Head
Sealing

Head Seal captured in the head gives better sealing & avoids seal roll, eliminating head seal leakage.

Locking groove

Integrally wound locking groove provides enhanced end margin strength.

EcoLine 4" Membrane Housings Specifications

Model Number	Drawing Number	Design / Operating Pressure	Maximum Operating Temperature	Element length
40L30	99199	300 psi / 20 Bar	120°F / 49°C	1 - 3

Above specifications are subject to change without prior notice

Committed to Quality

Our commitment to quality & continuous improvements, guarantees world-class products. Our ISO 9001:2000 certified state-of-the-art manufacturing facility builds pressure vessels using only the highest-grade material. Each EcoLine membrane housing is subject to vigorous quality inspection and hydro-testing before it is shipped.
