Maximized Performance for the Most Challenging Applications

Brackish Water Reverse Osmosis (RO) Membranes LG MaxRO R

Highest rejection BWRO membrane integrated with an innovative 36 mil ultra-low dP (ULD) feed spacer technology

Overview

MaxRO is a suite of membrane products engineered with the quintessence of LG Chem's best RO membrane technologies and precision manufacturing techniques.

LG MaxRO R is the highest rejection BWRO membrane integrated with an innovative 36 mil ultra-low dP feed spacer designed to optimize the flow regime on the membrane surface. The results are superior water quality with significantly reduced differential pressure and membrane fouling potential.

LG MaxRO R is for the most challenging membrane applications, requiring high salt rejection, robust durability, and excellent fouling resistance. LG MaxRO R leads to a marked decrease in cleaning frequency and chemical usage, reducing your plant's overall operational costs. Maximize Plant Uptime with LG MaxRO R.
